

UART_Exported_Functions

UART_Exported_Functions
_Group4

```
graph LR; A[UART_Exported_Functions_Group4] --> B[UART_Exported_Functions]
```

The diagram illustrates a pointer relationship. A gray rectangular box on the right, labeled 'UART_Exported_Functions_Group4', has a black arrow pointing left to a white rectangular box on the left, labeled 'UART_Exported_Functions'. This indicates that the group of functions points to the main set of exported functions.
