

arm\_add\_q7

arm\_offset\_q7

\_\_QADD8

```
graph LR; A[arm_add_q7] --> C[__QADD8]; B[arm_offset_q7] --> C;
```

The diagram illustrates a code reuse or abstraction pattern. Two source functions, 'arm\_add\_q7' and 'arm\_offset\_q7', are shown on the left. Both have blue arrows pointing to a single target function, '\_\_QADD8', which is shown in a gray box on the right. This suggests that both source functions are implemented by or delegate to the same underlying '\_\_QADD8' operation.
