

arm\_cfft\_radix2\_q15

arm\_cfft\_radix4\_q15

arm\_bitreversal\_q15

```
graph LR; A[arm_cfft_radix2_q15] --> C[arm_bitreversal_q15]; B[arm_cfft_radix4_q15] --> C;
```

The diagram illustrates a functional dependency. On the left, two white rectangular boxes with black borders are stacked vertically. The top box contains the text 'arm\_cfft\_radix2\_q15' and the bottom box contains 'arm\_cfft\_radix4\_q15'. On the right, there is a single gray rectangular box with a black border containing the text 'arm\_bitreversal\_q15'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions on the left serve as inputs or dependencies for the function on the right.
